

09 November 2023

Dear GIC Centre administrator,

Resuscitation Council UK course materials are reviewed regularly to ensure they reflect most current evidence based practice. These materials are utilised on the Generic Instructor Course (GIC) in a truncated form to facilitate practice of assessment strategies by trainee instructors attending the course.

Based on feedback from instructors and centres, we have updated the airway test to include all key interventions and reflect the natural flow of the NLS airway test.

Please check the LMS and ensure that the most current NLS airway test is utilised on all GIC courses going forward. If you have any queries please contact GIC@resus.org.uk

Kind regards

Isabelle Hamilton-Bower

Clinical Lead
